

Build Nova Scotia Supplier Performance Evaluation (SPE) Guideline

Purpose

The purpose of the SPE Guideline is to provide an evaluative record, both positive and negative, of a proponent's performance on select Tenders that have been awarded by Build Nova Scotia. This tool will be used, where warranted, to assess performance and when considering a proponent's eligibility for future awards.

SPEs are conducted by Build Nova Scotia staff with oversight from the Director, Procurement and Executive Management Team as may be appropriate.

Scoring

Using the SPE policy, the proponent will be evaluated on how it meets the "Deliverables" in the following four major categories:

- (a) **Quality** – Did the proponent meet all Deliverable expectations, be it in the provision of a good, delivery of a service, and or the construction of some form of infrastructure? Were Deliverable outcomes compliant with all applicable/relevant regulatory requirements?

- (b) **Safety and Environmental Stewardship** – Did the proponent comply with applicable building, OHS, and environmental safety regulations? Did they meet all Deliverable expectations in a safe and sustainable manner, taking all reasonable steps to protect people, property, and the environment from injury and or damage?

- (c) **Execution** – Were Deliverable expectations on budget, on time, and was the proponent's conduct collaborative and respectful with all Tender stakeholders?

- (d) **Administration** – Did the proponent comply with all contractual administrative requirements such as, but not limited to, delivery notifications, progress reporting, reports and designs, incident reporting, invoicing, and other documentation?

The proponent is rated on each category based on the following definitions:

EX (Exceptional Performance)

Far exceeded Deliverable expectations due to exceptionally high product, service, and or construction quality outcomes.

EE (Exceeds Expectations)

Exceeded Deliverable expectations due to high product, service, and or construction quality outcomes.

ME (Meets Expectations)

Met product, service, and or construction quality expectations and outcomes with few if any issues.

IN (Improvement Needed)

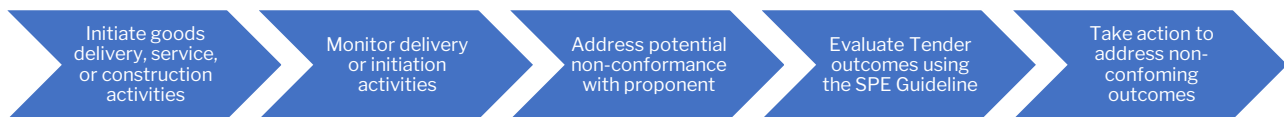

Performance failed to meet product, service, and or construction quality expectations in one or more essential areas of responsibility. Required some additional staff time and resources to meet contract expectations and outcomes.

UN (Unsatisfactory)

Consistently below product, service, and or construction quality expectations in most essential areas of responsibility. Required significant additional staff time and resources to meet contract expectations and outcomes.

Action

At the first sign of potential contract non-compliance the Tender Lead **must** contact the proponent in writing. The proponent must be apprised of any departures from contract expectations and Deliverables, what must be achieved to regain conformance, and they must be provided reasonable opportunity to do so. This must be a collaborative process that demonstrates good faith and a shared commitment to meeting all contract expectations.

While informal meetings and discussions may be of value in this process, proponents may not be suspended from future award opportunities if potential situations of non-conformance are not formally discussed, documented, and acknowledged.

The score generated by an approved SPE form may result in the following:

Warning Recommendation

Any ONE of the following shall initiate a report to the Director, Procurement recommending a warning letter to the proponent indicating risk of potential future suspension:

- (a) a final score of less than 10; or
- (b) a final criterion check of “IN” for “Safety and Environmental Stewardship” and or “Execution”

Suspension Recommendation

Any ONE of the following shall initiate a report to Senior Management, through the Director, Procurement, recommending a suspension:

- (a) a final score of less than 6; or
- (b) a final criterion check of “UN” for “Safety and Environmental Stewardship” and or “Execution”

Suspensions

A first suspension shall be for no more than two (2) months. A second suspension shall be for no more than four (4) months. Subsequent suspensions shall be for no more than six (6) months.

Objections

In the event of a Warning or Suspension where the proponent does not agree with the SPE score, they must submit objections in writing with supporting evidence within thirty (30) business days following receipt of the report to the procurement@buildns.ca.

Based on the information provided it shall be at Build Nova Scotia's sole discretion whether the score shall be amended.

Suspension

Other than contracts/subcontracts that the proponent is already performing work under at the time of suspension, *the proponent is not eligible to bid on Build Nova Scotia Tenders and may not perform work as a subcontractor, consultant, subconsultant, or supplier for the duration of the suspension.* The suspension of the proponent also applies to:

- (a) any legal entity that is affiliated with the proponent within the meaning of the Business Corporations Act;
- (b) any related person of the proponent within the meaning of the Business Corporations Act; and
- (c) other legal entities having the same operating mind as the contractor, as determined in consultation with Legal Services

After the suspension period, the proponent may bid on Build Nova Scotia Tenders and or work as a subcontractor.
