## Description of the Site

There are two sites available in this BDO for operator proposals; Site A is 210 feet (ft) of floating dock space on the north side of Cable Wharf with 90 additional ft of wharfage, and Site B is 150ft of wharf space on the south side of Cable Wharf.

Operators should specify in their proposal which site they are applying to and how many linear feet they will require to operate their business. Operators will be able to apply for both sites together but should note that Build Nova Scotia is not able to offer a continuous space of 450ft.

Please note that Site B is meant for vessels that can dock along the wharf and have patrons enter and exit the vessel directly from the wharf. For this opportunity, operators are expected to utilize the proposed amount of dock and wharf space in a way that does not conflict with the existing operations. This includes maneuvering, docking line setup, and customer interaction with the berth. There will be access to freshwater. Operators are to outline their shore power requirements; Build Nova Scotia will work with the preferred proponent(s) to install sufficient receptacles if possible. Operators need to be prepared to invest in their shore power setup.

## Site A

- Floating docks at this site are 20ft x 8ft in size with a freeboard height of approximately 1.5ft.
- The site is serviced by two gangways (each 30ft in length)
- Each floating dock has three cleats (as per the pictures at the end of this BDO)
- There are eight existing 10-ton B2 bollards on the main wharf (seven on the Northside and one on the South side)
- Operators to make themselves fully aware of the existing site and provide sufficient fendering for their proposed vessel(s), to be approved by Build Nova Scotia, as not to cause damage or excessive wear and tear to existing infrastructure.
- Operator investment in the site will be required to continue to operation safely at this site; operator(s) are to propose a solution for safe vessel mooring and have it installed prior to April 2026.
- Proponent is to provide an engineer stamped design for all proposed upgrades, which is to be reviewed and approved by Build Nova Scotia prior to any tenant improvements.
- Minimum required operator investment is the installation of three (3) Build Nova Scotia approved steel pipe pile bollards.

## Site B

- Vessels to lay directly against the existing fender piles, unless a floating dock system is installed at the Operator's cost.
- Operators to provide sufficient fendering for their proposed vessel(s) to be approved by Build Nova Scotia, as not to cause damage or excessive wear and tear to existing infrastructure.
- Operators to provide gangway(s) for loading and unloading passengers.
- Operators are to advise on any additional improvements that may be required for safe vessel mooring. Any proposed improvements are to be reviewed and approved by Build Nova Scotia prior to the tenant undertaking improvements.

All tenant improvements are the sole financial responsibility of the selected operator. All costs associated with business operations, including but not limited to utilities, repairs and maintenance, applicable taxes, etc., are the sole financial responsibility of the Successful Operator.

Access to each site is via a singular U-shape wharf that runs along the Cable Wharf Building, which is shared with other business operators. There are limited options for the placement of items on the floating docks and wharf. Operators are expected to clearly identify their needs for the placement of items like fenders, storage crates, etc. Water depths in both locations exceed 5m at low tide.

Please note that shore space is not included in this opportunity. If you require shore space to operate your business, such as operating a ticket booth, please include these details in your proposal for Build Nova Scotia's consideration. Build Nova Scotia makes no guarantees on the ability to provide shore space to any operator.

## Description of the Opportunity and Desired Outcomes

Build Nova Scotia's objective through this BDO is to expand marine offerings on the Halifax Waterfront and continue to grow marine tourism in Nova Scotia.

The successful operator will provide group tour marine services to the public, while complementing, and not operating in competition with the existing businesses on the waterfront. For this specific opportunity, only vessels with passenger capacities over 12 will be considered.

Build Nova Scotia partners with operators that share a desire to enhance the Halifax Waterfront as a vibrant destination for locals and visitors by providing an engaging and memorable experience for the public. Operators should consider how their business expansion will create a memorable experience for their patrons and the public.

The minimum term of the lease agreement for this opportunity is five (5) years.

Proposals that do not meet Build Nova Scotia's outcome and deliverable requirements and or expectations will not be considered.

Should none of the proposals received satisfy Build Nova Scotia's outcome and deliverable requirements, or for any other reason, Build Nova Scotia reserves the right to terminate this BDO without award.

## Operator Requirements

The proposed operators must:

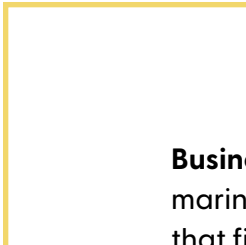

- Comply with all associated Transport Canada Marine Safety and Security (TCMSS) rules and regulations.
- Operators are required to install, maintain and operate Class A IMO compliant Automatic Identification Systems (AIS) on their vessels.
- Operate a marine-based tour business that provides customers with a high-quality experience meant for large group excursions.
- Provide a unique experience offering on the waterfront, featuring a range of price points, ensuring an accessible experience for all visitors.
- Provide an excellent experience for the customer with regard to service quality, staff service, perceived value, consistent, and reliable hours of operation, and overall experience.
- Provide their proposed operations from at least May 15th to October 15th during each year of the term.
- Complement other businesses on the Halifax Waterfront.
- Generate economic activity by creating sources of employment and income.
- Employ business practices and engage in partnerships that are socially responsible and environmentally sustainable.

## Process Outline and Selection Criteria

Potential operators are to submit a proposal no more than 10 pages in length.

Proposals must include, and will be evaluated on, the following criteria:

**Strategic Alignment (20% of overall score)** – The operators that Build Nova Scotia partners with will understand what is important to Build Nova Scotia on the Halifax Waterfront and detail how they will accomplish the Operator Requirements and Desired Outcomes detailed above. Proposals should address how the operator's values and goals align with Build Nova Scotia's.

**Business Concept (25% of overall score)** – Build Nova Scotia must curate a waterfront marine offering that ensures public safety, service, and or adventure variety, and that fits within a changing floating dock portfolio. Proponents must clearly identify how they can operate within the proposed amount of space, (docking layout, berthing line set up, gangway utilization etc.), without interference with existing operations and utilizing the existing structures (floating docks, bollards etc. on an as and where is basis. Should their proposed vessel(s) require structural changes or improvements, these need to be identified in the proposal. Proponents must clearly identify the size, draft, age, condition, method of propulsion and on-board safety equipment of vessel(s) being proposed and are expected to work with the site amenities as outlined in the Detailed Description of the Site. Appropriate and relevant licenses, certifications, and training must also be included.

Proposals must define the operations for this site, how you propose to do it, hours of operation, and how the concept further enhances the current business offerings on the Halifax Waterfront. Operations must complement existing businesses on the waterfront.

Potential operators must also provide a detailed list of proposed tour and excursion service offerings and include proposed public pricing and a commitment to maintain affordable estimated price points throughout the duration of the lease term.

**Business Experience (20% of overall score)** – Potential operators are to describe the business experience and expertise of the proposed management team that is relevant to and will be directly involved in the proposed operation.

Potential operators must include a description of their operational capacity and capability to proceed with the proposed operation, including but not limited to existing staff, how staff will be used to run the proposed operation, infrastructure, and other resources available to the potential operators.

Potential operators should provide a description of their financial capacity to carry out the business proposed, including available equity, lines of credit, business loans, etc. This can include such documentation as signed letters from banking institutions.

**Added Value (15% of overall score)** – What unique value would you bring to the Halifax Waterfront that would elevate this initiative? This must include, but is not limited to:

- **Accessibility.** Potential operators should include a description of how their proposed operation will prevent and remove all forms of accessibility barriers within their operation.
- **Sustainability.** Build Nova Scotia seeks to work with suppliers who have the knowledge and capacity to support and apply the principles of sustainability and safety to their own operations. To help Build Nova Scotia better understand the sustainable attributes of your submission, all operators must complete the sustainability assessment found in the [Sustainability Assessment template](#). Complete the Sustainability Assessment, save the document, and include it with your submission. Operators are also encouraged to highlight any sustainable practices (e.g. using propulsion methods other than standard combustion engines, considering the waterfront's [Blue Flag certification](#), packaging, greenhouse gas reduction, waste diversion and reduction, worker health and safety, and local economic development) in connection to their operations throughout their proposal.
- **Social Responsibility.** Social responsibility comes in many forms. Both large and small businesses, regardless of industry, can make a big difference in their communities. Potential operators should explain how they make a social difference. This could include, but is not limited to, your respect and support of social and cultural diversity, your commitment to equity and inclusion, charitable partnerships, and community and volunteering.
- **Creativity and Innovation.** Potential operators should include the ways in which their operation is truly creative, innovative, and unique. This could include, but is not limited to use of space, tour diversity, technology, and customer experience.

- **Financial Proposal (20% of overall score)** – Each submission is required to include a per-month base rent, to be proposed by the operator, regardless of sales achieved. Please note there is a minimum base rent of \$25.00 + HST per linear foot per month.

Operators can choose to offer a higher base monthly rent in an attempt to score higher on their Financial Proposal, but operators cannot offer less than the minimum base rent. In addition to monthly base rent, operators must submit a proposed percentage of sales which, together with the base rent, will comprise the total proposed monthly rent payable to Build Nova Scotia.

Potential operators must provide a revenue forecast for the five (5) years of their term. Unreasonable sales forecasts may be leveled using relevant historical sales data at Build Nova Scotia's sole discretion.

Any required site improvements fit-up, additional equipment, infrastructure, etc. are the sole financial responsibility of the successful respondent and are subject to prior review and written approval by Build Nova Scotia.

Any damages to site infrastructure such as timber pilings, floating wharves, fendering etc. which are deemed by Build Nova Scotia to be caused by or the result of the respondent's operation during the duration of the lease term are to be professionally repaired at the respondent's expense prior to the termination of the lease.
